J•DRAIN® 700 Series

Prefabricated Drainage Composites

APPLICATIONS
- PLANTERS
- ROOF GARDENS
- PLAZA DECKS
- SPLIT-SLABS

J•DRAIN® 700 Series performs a multi-faceted role by providing protection for waterproofing systems and collecting excess water in plaza decks, split slabs, planters, roof top gardens, and other horizontal surfaces. Planting soil is retained while allowing water to pass into the drainage core. The collected water is then conveyed to a proper collection system.

J•DRAIN 700
Consists of a heavy duty impermeable polymeric sheet cusped under heat and pressure to form a high flow dimpled drainage core. The core is then bonded to a layer of woven filter fabric. The filter fabric retains soil or sand particles as well as freshly placed concrete or grout, allowing filtered water to pass into the drainage core.

J•DRAIN 720
The identical properties as J•DRAIN 700 with the addition of a protection sheet bonded to the back side of the cusped core providing for soft membrane waterproofing systems. J•DRAIN 720 is compatible with waterproofing without the use of a protection board.

J•DRAIN 740
Consists of a heavy duty impermeable polymeric cusped sheet identical to J•DRAIN 700, but bonded to a layer of non-woven filter fabric. (4 oz/sq yd)

J•DRAIN 760
Consists of a heavy duty impermeable polymeric cusped sheet identical to J•DRAIN 700, but bonded to a layer of non-woven filter fabric. (6 oz/sq yd)

J•DRAIN 780
Consists of a heavy duty impermeable polymeric cusped sheet identical to J•DRAIN 700, but bonded to a layer of non-woven filter fabric. (8 oz/sq yd)

### Applications:

- **PLAZA DECKS**
- **SPLIT-SLAB**
- **PLANTERS & ROOF GARDENS**

**NOTE:** When using J•DRAIN 700 series cut and remove drainage core and cover with an aluminum plate as shown.

Determination of suitability for use is the responsibility of the user. JDR’s Limitations, Limited Warranty, & Disclaimer along with Standard Terms & Conditions apply. See www.j-drain.com for more info. Limitations: J•DRAIN is resistant to chemicals in normal soil environments. However, some reagents may affect the performance of J•DRAIN. A JDR representative should be contacted for further information to determine the suitability of use of J•DRAIN in unusual soil environments. J•DRAIN should be backfilled or covered within seven days of installation. Disclaimer: All information, drawings and specifications are based on the latest published information at the time of printing. JDR reserves the right to make changes due to manufacturing improvements and engineering at any time. All physical properties are minimum average roll values (MARV). Standard variations of 10% in mechanical properties and 15% in hydraulic properties are normal.
