

# J-DRAIN

**Engineered Drainage Systems** 

#### **APPLICATIONS**

RETAINING WALLS LAGGING WALLS FOUNDATION WALLS BRIDGE ABUTMENTS

## **J-DRAIN® ES 1100 Series**

Meets AASHTO M 288 Requirements

#### **J-DRAIN ES 1100**

For over 30 years, J-DRAIN drainage composites have been successfully installed to relieve hydrostatic pressure in building construction, civil engineering, environmental and landscape applications. Eliminating the costly and timeconsuming installation of drainage aggregate, J-DRAIN drainage composites provide a more efficient, cost effective way to provide sub-surface drainage. The ES 1100 series of prefabricated drainage composites are engineered to provide superior performance to meet specific project conditions. The multi-directional flow design allows for a continuous path for water discharge. E\$ 1100 is lightweight, easy to install and has drainage flow capacities that are 3-5 times that of traditional aggregate systems.

The **ES 1100's** three dimensional dimpled core is formed from a chemical resistant polypropylene polymer. By extruding each dimple to exact performance standards, the high compressive strength of the core withstands installation and insitu earth stresses. The geotextile filter fabric is fused to the dimpled core for superior peel resistance and structural integrity. The integrated core and fabric system optimizes drainage channel consistency, minimizing soil particle intrusion for maximum flow capacity, allowing water to freely enter the drainage channel. The ES 1100 series is engineered for intermediate flow requirements with moderate soil pressure conditions in vertical applications, available with nonwoven or woven geotextile filter fabrics meeting AASHTO M288-06 specifications for survivability.

Roll Size: 4, 6, or 8 foot width x 50 foot length. Specialty roll widths and fabrics require additional lead time and minimum quantity orders. \*ES 1130B is identical to ES 1130 with the addition of a protection sheet bonded to the back side of the sheet available in 4' widths only.

The information contained herein is believed by JDR Enterprises, Inc. to be accurate and is offered solely for the customer's consideration, investigation and verification. Determination of suitability for use is the responsibility of the user. JDR's Limitations, Limitations, Limitations, Limitations and possible standard Terms & Conditions apply. See www.j-drain.com more info. Limitations: 4-DRain in its resistant to chemicals in normal soil environments. However, some reagents may affect the performance of J-DRain. A JDR reservations to determine the suitability of use of J-DRain in unusual convironments. J-DRain should be limited to ultra-violet usulight. J-DRain should be schilled or covered within seven days of installation. <u>Disclainers</u>: All information, drawings and specifications are based on the latest published information at the time of printing. JDR reserves the right to make changes due to manufacturing improvements and engineering at any time. All physical properties are minimum average roll values (MARV). Standard variations of 10% in mechanical properties are institutions of 10% in mechanical properties are the properties are unfainted.
